

GOLD BRICKS CARES FOR THE BEES

GoldApis⁺ is a product tested on more than 150 honey bee colonies in 6 apiaries in Macedonia*.

The results showed that compared to products from other producers, honey bee colonies consume the **GoldApis⁺** fondant the fastest and the most

In addition, laboratory research has shown that, due to the low level of HMF** and the specific production technology, physiological stress is the lowest in bees fed with **GoldApis⁺**.

*Jovanovska et al. (2022) Testing different types of solid food for honey bee colonies.

**HMF analyzed according to AOAC Official Method.

GoldApis⁺ obtained according to the highest hygienic and safety standards for the production of animal food.

Decision number from the Register of Registered Facilities and Food Operators: 22 R1 SK 0507/18-4358.

**SUGAR PASTE
- FONDANT -**

**GOLD
APIS⁺**

Bees Gold Food

What is **GOLD APIS⁺**?

GoldApis⁺ is a sugar paste (fondant) that is used as **food for honey bee colonies** that easily and quickly consume it and store it in the hive.

Prepared in Macedonia using **state-of-the-art technology**, **GoldApis⁺** consists of fine crystals of white table sugar which, due to the specific production technology, do not turn into large and coarse crystals.

It allows **beekeepers to apply it easily**, it retains its properties for a long time and, most importantly, bees consume it with minimal physiological stress, which enables the breeding of **healthy and productive honey bee colonies**.

WHY DO BEEKEEPERS USE **GOLD APIS⁺**?

- Compared to other solid food products, bees consume **GoldApis⁺** fondant the fastest and most.
- **GoldApis⁺** can be used immediately.
- The dimensions and type of packaging allows:
 - ▶ Quick and easy addition to honey bee colonies.
 - ▶ Maximum utilization by the bees, without residues and spreading.
 - ▶ Keeping its properties, in the packaging and in the hive.
 - ▶ Does not cause robbery between honey bee colonies.

WHEN AND HOW IS USED **GOLD APIS⁺**?

- **GoldApis⁺** can be used at any time of the year.
- ▶ **GoldApis⁺** is available in packages of **0.5 kg, 1 kg** and **5 kg**, and the decision of which package to use depends on the condition of the honey bee colony and the need.
- ▶ The way in which the package is opened depends on the purpose, i.e., whether it is added to a productive honey bee colony, nucleus or mating box. Recommendations are given on the back of the package.

GoldApis⁺ ✓ **BEEKEEPER'S TRICK**

Due to its specific consistency, **GoldApis⁺** can also be placed directly over the honey bee colony, however over the **queen excluder**, for easier removal when working with the hive frames.
